Changes to the list of Statements of Principles and names of conditions, August 2021

Changes to the list of Statements of Principles and names of conditions, August 2021

On 5 August 2021 changes were made to:

- the list of Australian Statements of Principles that apply in New Zealand
- the list of accepted late-onset conditions.

Statements of Principles

The Statements of Principles are a tool to determine if an injury, illness or death is service-related.

[More information on Statements of Principles](#)

The Veterans' Support Amendment Regulations (No 4) 2021 brought into force 2 new and 16 replacement Statements of Principles.

These Statements of Principles cover:

- acute lymphoblastic leukaemia/lymphoblastic lymphoma
- ankylosing spondylitis
- asthma
- deep vein thrombosis
- malignant neoplasm of the kidney
- posterior tibialis tendinopathy
- pulmonary thromboembolism
- seborrhoeic dermatitis.

Accepted late-onset conditions

The names of several conditions on the list of accepted late-onset conditions at Schedule 2A of the Veterans' Support Regulations have been updated, either to correct misspellings, or to align the names with the current names of Statements of Principles from which they were derived.

See the amendment regulation cited below for more information on these changes. Accepted late-onset conditions are conditions that could be accepted as being linked to specific exposure or events occurring during qualifying operational service. They are applied to Scheme Two veterans only. Their purpose is to ensure that families of veterans whose death was the result of a late-onset malignancy or other physical or mental disorder receive entitlements under the Veterans' Support Act 2014.
